REQUIREMENT

Key Risks and Security
Concerns in Modern
Businesses

Key Risks and Security Concerns in Modern Businesses

- 1. Theft and Vandalism :** Unauthorized access and damage to property remain significant challenges for businesses, especially in retail and industrial sectors. Studies show retail theft accounts for billions in global losses annually.
- 2. Workplace Violence :** Incidents of violence or harassment within workplaces can disrupt operations and harm employee well-being. Security measures like access control and surveillance can help mitigate such risks.
- 3. Emergency Preparedness Gaps :** Lack of effective systems for fire detection, evacuation planning, or disaster response can result in severe consequences. Fire incidents cause millions in damages and hundreds of injuries annually.
- 4. Liability Concerns:** Inadequate security can lead to lawsuits or reputational damage, affecting customer trust and profitability.

03 OUR SERVICES

Video Surveillance

HD, I.P. and Wireless
CCTV

Fire & Safety

Conventional & Addressable
Fire Alarm System

■ Chandigarh

■ Dehradun

■ Kolkata

■ Bangalore

■ Hyderabad

■ Jaipur

■ Bhopal

■ Patna

■ Chennai

■ Mumbai

■ Pune

Ensuring top-notch service delivery and customer satisfaction throughout the country.

05 OUR PROCESS

Ensuring Comprehensive Security Solutions

- 1. Initial Consultation and Site Assessment :** We begin by understanding your specific security needs through a detailed consultation. Our team conducts a thorough on-site assessment to evaluate potential vulnerabilities, the layout of your property, and the unique challenges you face. This step ensures we have a clear picture of your requirements and priorities.
- 2. Customized Security Plan Design :** Based on the assessment, we design a tailored security plan that aligns with your objectives. Whether you need surveillance, access control, fire safety, or intrusion detection, our team ensures the solution is customized to your environment. This includes selecting the right equipment, mapping out the placement of devices, and incorporating advanced features like AI-based CCTV or smart automation systems.
- 3. Deployment of Resources and Equipment :** Once the plan is finalized, our skilled technical team proceeds with the installation and deployment of all necessary resources. This involves setting up surveillance cameras, alarm systems, networking infrastructure, and any other security devices. Our team ensures seamless integration, testing each component for optimal functionality.
- 4. Ongoing Monitoring, Evaluation, and Reporting :** After deployment, we provide 24/7 monitoring and support to ensure your systems operate flawlessly. Regular evaluations and updates are conducted to adapt to new threats or changes in your requirements. We also offer detailed reporting and analytics, helping you stay informed about the performance and reliability of your security system.

CONTINUOUS IMPROVEMENT PROGRAM

1. DEFINE

Define SLA Levels

Response Time -
12hours

Resolution Time -
24hours

Uptime - Above 90%

2. MEASURE

Measuring the SLA
through monthly
uptime reports.

3. ANALYSE

Analyse the root
cause of calls going
beyond SLA

- . Manpower
- . Diagnosis
- . Spare Parts

4. IMPROVE

Feedback to
respective teams

- . Service Team
- . Training Team
- . Procurement Team

5. CONTROL

Implementation of
action plan by
respective teams to
reduce complaints
going beyond SLA.

OUR CUSTOM SECURITY PLANS

Our services are designed with flexibility at their core, allowing us to customize security packages to meet the unique needs of each client. Whether you're looking for basic services or comprehensive protection, we can tailor a solution that aligns with your specific requirements and priorities. By focusing on value rather than a one-size-fits-all approach, we ensure you get exactly what you need without unnecessary extras. This commitment to customization means you benefit from a security solution that is not only effective but also perfectly suited to your environment and goals.

OUR Commitment

Ensuring Comprehensive Security Solutions

Standby Product

Standby products of reputed brands within 24 hours in case of major Breakdown

Uptime

Quarterly service review and commit more than 90% Uptime (complaints resolved within 24hrs).

Action Plan

We discuss action plan with clients for calls beyond SLA and work on it.
